

# FIU Geology Club members participate in the Miami Mineralogical and Lapidary Guild show on Saturday April 14<sup>th</sup>, 2018

- The club presented different fossils, minerals and sand grains from Costa Rica and Hawaii.
- A large pieces of Key Largo limestone and Miami Limestone (Oolite) were displayed for public outreach and education.
- UV lights demonstrated different minerals properties (e.g., fluorescence).
- QR codes contained files of Florida's Hydrology and FIU 3-D mineral scans.
